

Ray Cycle the Raccoon Recycles Plastic

Soda bottles, water bottles, milk jugs and orange juice bottles are all made out of plastic.

To get plastic ready for the magic of recycling, Ray takes off the lids and rinses out the bottles to get them really clean inside.

Then, to save space, he stomps on them and gets them really, really flat!

Recycling turns stinky, old stuff into shiny, new stuff. Recycling also helps the places we live and play stay nice and clean.
