

Ray Cycle the Raccoon loves to recycle! He loves to help turn stinky, old garbage into shiny, new stuff. It's like magic! And it keeps the places Ray loves to play nice and clean!

Ray loves to teach boys and girls how to recycle, too. He starts by sorting through the garbage and putting plastic, metal, aluminum and paper into their own piles. He gets everything as clean as he can.

Then Ray puts everything into its own box or bag to get it ready to take to the recycling center. Ray loves stomping on the plastic bottles and aluminum cans to get them really small so they can all fit in the right boxes and bags.

Ray has his Mom and Dad take him and all the old stuff to the recycling center so it can be recycled into new stuff. You can, too! Help Ray recycle and help keep the places we live and play nice and clean.
